Amazon Sales Performance Analysis

I went through the dashboard, which covers 250 orders, 714 units, 5 categories and 10 cities. Here is what stands out, in plain terms.

Big Values

Metric	Value
Total Sales	$243,845
Total Orders	250
Average Order Value	$975.38
Total Categories	5
Total Units Sold	714

1. What Sells the Most?

By revenue: Electronics is the clear winner at $129,950, about 53% of everything we sold. Home Appliances comes next at $105,000 (around 43%). Those two categories alone bring in roughly 96% of our revenue, while Footwear ($4,320), Clothing ($3,540) and Books ($1,035) share the last 4% or so.

By units: Smartwatches are the crowd favourite with 105 units sold, about 15% of the total, and Smartphones follow close behind at 97. Laptops and Headphones sit at 73 each, Running Shoes at 72, and Washing Machines bring up the rear at 45.

2. Where Our Sales Come From

Rank	City	Sales	Share
1	Miami	$31,700	13.0%
2	Denver	$29,785	12.2%
3	Houston	$28,390	11.6%

Rank	City	Sales	Share
4	Dallas	$27,145	11.1%
5	Seattle	$26,890	11.0%
6	Boston	$26,170	10.7%
7	Chicago	$20,810	8.5%
8	New York	$18,940	7.8%
9	Los Angeles	$17,820	7.3%
10	San Francisco	$16,195	6.6%

- Miami leads the pack at $31,700 (13% of sales), followed by Denver and Houston. Together, these three cities make up about 37% of the total.
- The spread is healthy. The top six cities each bring in 10-13% of sales, so we are not leaning on any single market.
- San Francisco, Los Angeles and New York sit at the bottom. For cities that big, that looks like room to grow rather than a weakness.

3. Completed vs Cancelled Orders

Status	Orders	Share
Completed	88	35.2%
Pending	85	34.0%
Cancelled	77	30.8%

- For every 8 completed orders, about 7 get cancelled (77 cancelled against 88 completed), a ratio of roughly 0.88 to 1.
- Only about 35% of orders are completed, while nearly 31% are cancelled. That is a lot of lost business and worth a closer look.
- Another 34% are still pending, so the speed of fulfilment looks like a bottleneck too.
- If Total Sales counts cancelled and pending orders, the revenue we have actually kept is probably well below $243,845.

4. How Customers Like to Pay

Payment Method	Share
PayPal	24%
Credit Card	22%
Debit Card	21%
Gift Card	17%
Amazon Pay	16%

- PayPal is the favourite at 24%, but the gap is small. Every method sits between 16% and 24%, so no single option dominates.
- Cards (credit and debit) add up to about 43% of payments, and digital wallets (PayPal and Amazon Pay) to about 40%.
- Gift Cards make up a notable 17%, which may point to promotions or gifting driving some purchases.

What It All Means

- Almost all of our revenue (about 96%) rides on Electronics and Home Appliances.
- Smartwatches and Smartphones are our top sellers by units.
- Miami, Denver and Houston lead the way, while San Francisco, Los Angeles and New York have some catching up to do.
- Only 35% of orders are completed, with 31% cancelled and 34% still pending.
- Payments are split fairly evenly, with PayPal just ahead.
